Muhammad Awais Aslam

Date of birth: 28/03/1999 | **Nationality:** Pakistani | **Gender:** Male | **Phone number:** (+92) 03041822862 (Mobile) | **Email address:** dr.m.awais003@gmail.com | **LinkedIn:** Muhammad Awais Aslam |

Address: House no. 12, Street no. 12, Abbasi Road, Banigala, 44000, Islamabad, Pakistan (Home)

ABOUT ME

I am a highly skilled DevOps engineer with 4 years of experience specializing in Linux server environments, containerization, and cloud infrastructure. As an RHEL Certified professional, I have a strong command of system administration and automation. My expertise includes leveraging Docker for containerized deployments and utilizing AWS Cloud to design and manage scalable, reliable solutions. I thrive in optimizing workflows, enhancing system reliability, and delivering efficient infrastructure solutions.

EDUCATION AND TRAINING

2018 – 2022 Faisalabad, Pakistan
BACHELOR'S IN COMPUTER SCIENCES University of Agriculture

WORK EXPERIENCE

02/2021 – 03/2022 Faisalabad, Pakistan
SYSTEM ADMINISTRATOR TECHBOSS

- Installed, configured, and troubleshot **hypervisors** (bare-metal and type 2) and Fedora/Debian-based operating systems.
- Set up and configured **SSH**, ownerships and permissions, advanced permissions, and user management.
- Managed runlevels/targets and added storage from LUN Scanning/SAN, including partitioning and Logical Volume Management (**LVM**).
- Scanned and resolved bad blocks, performed backups using rsync, and automated tasks with the crond **scheduler**.

04/2022 – 06/2024 Karachi, Pakistan
J. DEVOPS ENGINEER AL NAFI CLOUD

- Utilized **AWS** tools, including EC2, Lambda, EBS, EFS, S3, Load Balancers, Security Groups, IAM (Users, Roles, Policies, Groups), ECS, ECR, Route 53, CloudFront, SES, AWS Certificate Manager, and CloudWatch.
- Managed system patches, kernel management, and network configurations.
- Handled user management, ownerships, **advanced permissions** (SUID, SGID, STICKYBITS, SUDOERS, UMASK, CHATTR, SETFACL), and firewalls/security groups.
- Installed and configured file-sharing services like NFS and Samba and file transfer services like FTP.
- Configured and managed **Apache** and **Nginx** servers for web hosting and reverse proxy setups, ensuring high availability using keepalived.
- Specialized in containerization using Docker, deploying multi-tier applications as microservices in Docker Swarm.
- Automated CI/CD pipelines using GitHub Actions, GitLab, and **Jenkins**, integrating pull and build operations via VCS **webhooks**.
- Configured and managed **MySQL** databases for multi-tier application deployments.
- Deployed **Ansible** as a configuration management tool for system-wide automation and maintenance.

07/2024 – 12/2024 Islamabad, Pakistan
DEVOPS ENGINEER GLOBAL FINANCIAL MEDIA

- Built and maintained **CICD** pipelines using Jenkins, Bitbucket, and GitHub, enabling seamless code integration and delivery.
- Provisioned and managed **AWS** resources (EC2, Lambda, EBS, EFS, S3, Route 53, CloudFront) for scalable and secure architectures.
- Configured security groups, **IAM** roles, policies, and multi-account structures to ensure secure cloud operations.
- Implemented auto-scaling and load balancing (**ALB**) to optimize performance and availability.
- Automated infrastructure setup and configuration using **Ansible**.

- Containerized applications using **Docker** and managed workloads with ECS and ECR for high availability.
- Deployed multi-tier apps in Docker Swarm, ensuring efficient resource utilization.
- Centralized monitoring with **ELK**, **Prometheus**, **Grafana**, **Nagios**, Monit, and Checkmk for performance and security insights.
- Automated SSL certificate management with Certbot, AWS Certificate Manager, and Ansible.
- Enhanced security and performance with WAF rules, Cloudflare configurations, and DNS migration to AWS Route 53.
- Managed PostgreSQL databases with secure access, backups, and disaster recovery protocols.
- Automated routine tasks and monitoring setups with Bash scripting, improving operational efficiency.

01/2025 – CURRENT Islamabad, Pakistan

SR. PLATFORM ENGINEER GLOBAL FINANCIAL MEDIA

Recognizing my expertise, exposure, and proven skills as a DevOps Engineer, I was recently promoted within the same organization to take on an advanced role with expanded responsibilities, further contributing to strategic initiatives and operational excellence.

LANGUAGE SKILLS

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

2024 – CURRENT

SSO for AWS Console Logins using Keycloak

- Implemented SSO for AWS Console access using Keycloak with SAML 2.0 for secure authentication.
- Integrated Keycloak with AWS IAM for role-based access control and automated user provisioning.
- Ensured seamless access across AWS accounts with robust testing and documentation.

Setup Centralized Logging and monitoring using ELK

- Deployed and configured the ELK stack (Elasticsearch, Logstash, Kibana) with Filebeat exporter for centralized log aggregation and monitoring.
- Designed pipelines to collect and parse logs from distributed systems, ensuring real-time visibility.
- Implemented dashboards in Kibana for actionable insights and rapid issue resolution.
- Optimized Elasticsearch indexing for efficient storage and faster querying of logs.
